

NEOWAVE and ISRA Cards announce an agreement to develop and market Badgeo FIDO2, a dual-interface card compatible with the FIDO2 standard

Gardanne, France - Jan. 24, 2020:

NEOWAVE, French leader in strong authentication solutions, and ISRA Cards, a French company specialized in manufacturing secure smartcards, strengthen their collaboration with a development and marketing partnership agreement of the Badgeo FIDO2 card. This card provides a strong and simplified authentication solution for the web and the cloud. The security has henceforth become accessible to all professionals in both mobile and desktop environments.

FIDO2 is the overarching term for FIDO (Fast Identity Online) Alliance's newest set of specifications. This open industry association is working to enhance online authentication security. It aims to specify and promote simple, strong and interoperable security architectures more secure than passwords and SMS OTP (One-Time-Password).

Badgeo FIDO2 features allow for great flexibility and meet many needs for various applications (secure identities, health, banking...).

Badgeo FIDO2 is a dual interface card, made in France, with contact (ISO 7816) and contactless/NFC (ISO 14443 type A, NXP MIFARE® DESFire® Ev1, Ev2) technologies.

It includes a EAL5+ Common Criteria certified JavaCard component, a FIDO2 application and a FIDO U2F one.

It is compatible with all OS markets, Windows, Mac OS, Linux, Android, iOS and online services that natively integrate the FIDO2 standard: Microsoft Azur Active Directory (Azur AD), Windows 10,... as well as the FIDO U2F standard, a second-factor authentication: Google, Gmail, Facebook, GitHub, Salesforce,....

Badgeo FIDO2 now enables a large number of businesses to access easily deployed, standardized and competitive logical and physical security solutions.

NEOWAVE will present Badgeo FIDO2 on its booth N°F11 at the FIC exhibition, in Lille (France) from 28 to 30 January, 2020.

“The generalization of the FIDO standard has gone one step further with the native integration of the new FIDO2 authentication standard by Microsoft to Azure Active Directory and Windows10. Thanks to our knowledge of the enterprise security market and to our historical relations with ISRA Cards, a French and independent manufacturer, we would like to propose a perfectly adapted card to enterprise'needs as well as to European agencies' security requirements. Visit us at the FIC on our exhibition booth to get further details about our products» states Bruno BERNARD, CEO of NEOWAVE.

« ISRA Cards and NEOWAVE reinforce a long lasting partnership in order to provide cybersecurity solutions which are proven and certified. We're very proud of this cooperation » states Jean Pierre CHAUVIN, CEO of ISRA Cards.

About de NEOWAVE :

NEOWAVE is an innovative French company, created in 2007, specializing in strong authentication and secure transactions. NEOWAVE products combine the high level of security provided by smart cards with the advantages of connectivity and storage technologies: USB, RFID / NFC and Bluetooth Low Energy (BLE). NEOWAVE products and services address the cybersecurity, digital trust and identity management markets. For further information: www.neowave.fr/US/index.html

About ISRA Cards :

ISRA is an independent French company specialising in the design and manufacture of secure cards and customised media, mainly dedicated to trade, access control, identification and transportation. As well as its products, ISRA offers a wide range of services such as printing, customisation, card programming and routing operations.
